Practical technology.
Better business.

Odoo Solutions / Business Consulting / IT Solutions

Connecting business understanding with dependable technology to make operations clearer, more efficient, and ready for what comes next.

OUR COMPANY

Clarity before complexity.

We help organizations get more value from their systems, people, and processes.

WHO WE ARE

Manbaa is a technology and business solutions company focused on helping organizations understand how they operate, identify opportunities for improvement, and select practical technology solutions aligned with their goals.

We see software as part of a larger business picture: the flow of information across departments, collaboration between teams, daily processes, and the visibility management needs to make informed decisions.

OUR FOUNDATION

15+ **years of combined experience**

Our founders and team bring experience across business applications, technology, and multiple industries and markets.

From first-time digital transformation to improving an existing platform, our focus is clear guidance, practical outcomes, and long-term relationships.

PERSPECTIVE

Experience across contexts.

Different industries require different operating models. We begin by understanding each organization on its own terms.

ODOO PROJECT EXPERIENCE

Our team brings collective experience in Odoo projects across manufacturing, construction, marketing, retail, and other sectors. This breadth helps us adapt workflows and implementation choices to each business.

01

Manufacturing

02

Construction

03

Marketing

04

Retail

Beyond these sectors, our experience extends to other fields and business environments, bringing a wider perspective to each engagement.

CROSS-MARKET EXPERIENCE

Experience across countries and markets helps us account for local needs, varied operating models, and business requirements.

OUR CAPABILITIES

What we do.

Integrated consulting and technology services, from initial assessment to implementation support and continuous improvement.

01

Odoo ERP Solutions

Requirements analysis, process mapping, solution planning, configuration, customization oversight, training, and post-go-live support.

02

Business & ERP Consulting

Workflow and business application reviews to identify bottlenecks and recommend clear, prioritized improvements.

03

System Support & Optimization

Functional follow-up, health reviews, issue coordination, and practical recommendations to improve existing systems.

04

Software Development & Integration

Tailored applications and integrations that connect systems, reduce repetitive work, and improve information flow.

05

Web & Digital Solutions

Website planning, development coordination, maintenance follow-up, and useful digital tools.

06

General IT Solutions

Practical technology guidance aligned with operational priorities, current needs, and growth plans.

ODOO ERP SOLUTIONS

Making ERP work for the business.

We help companies use Odoo to connect operations and support informed decisions. Our starting point is the reality of the organization: its people, processes, requirements, and priorities.

SUPPORT ACROSS THE JOURNEY

01 **Understand**

Business requirements and process mapping

02 **Plan**

Solution design and implementation coordination

03 **Configure**

System configuration and customization oversight

04 **Enable**

Training and post-go-live guidance

OUR DIRECTION

What guides us.

A practical philosophy built around business value, responsible recommendations, and collaborative delivery.

OUR MISSION

To empower businesses with dependable technology and informed consulting that simplify work, improve operational visibility, and support better decisions.

OUR VISION

To become a trusted partner for organizations seeking clearer processes, connected systems, accessible information, and lasting value from technology.

OUR CORE VALUES

- **Integrity**
- **Client focus**
- **Quality**
- **Collaboration**
- **Innovation**

A thoughtful partner.

Combining different perspectives to deliver recommendations that fit the organization rather than the other way around.

Business-first thinking

We understand objectives and processes before recommending technology.

Cross-industry perspective

Our collective experience spans manufacturing, construction, marketing, retail, and other fields.

International exposure

Experience across different markets informs an adaptable approach to client requirements.

Practical recommendations

We focus on clear, realistic improvements rather than unnecessary complexity.

Partnership mindset

We value transparency, responsiveness, collaboration, and long-term trust.

LET'S WORK TOGETHER

Better business starts with understanding.

Every organization has its own goals and challenges. We welcome the opportunity to learn about yours, discuss your priorities, and explore where the right combination of consulting and technology can make a difference.
